

Testimonial for Woodthorpe IT Solutions

We recently had the pleasure here at Future Health of having Ben from Woodthorpe IT Solutions deliver for us a day of Microsoft Office Training.

Ben came to our premises fully equipped with laptops and all of the relevant software and course materials. After taking over our boardroom for the day, he delivered bespoke training in MS Excel, Word, Outlook and Access to 8 members of our staff, including myself.

The general feedback from our team was very positive. We all generally picked up some new core skills as well as having the opportunity to ask specific questions relevant to our daily jobs. This has led to some of the team finding more efficient ways to get through their daily work load.

We will certainly be having Ben back again in the near future!

Yours faithfully,

Chris Bond
Financial Controller
